# SUGAR MANGO OR BABY MANGO

The sugar mango is a small Colombian cultivar with low fiber content, good aroma and flavor. This research evaluated antioxidant capacity (FRAP, DPPH) of the fruit at different ripening stages classified by visual inspection and CIELab scale. Nutritional and sensory characteristics and ORAC value were measured in the ripe fruit. Sensorial characteristics of two mango nectars sweetened with sucrose and sucralose using ripe fruit were determined by affective acceptance test and Hedonic scale.
